

QOCO: A QoE-Oriented Computation Offloading Algorithm based on Deep Reinforcement Learning for Mobile Edge Computing

Iman Rahmati, Hamed Shah-Mansouri, and Ali Movaghar

Sharif University of Technology, Tehran, Iran

September 27, 2023

Overview

Introduction

- Background

- Contribution

System Model

- Communication Model

- Computation Model

Problem Formulation

- Markov Decision Process

- QoE Optimization Problem

DRL-Based Offloading Algorithm

- DQN-based solution

Performance Evaluation

Conclusion and Future Work

Table of Contents

Introduction

Background

Contribution

System Model

Communication Model

Computation Model

Problem Formulation

Markov Decision Process

QoE Optimization Problem

DRL-Based Offloading Algorithm

DQN-based solution

Performance Evaluation

Conclusion and Future Work

Introduction

Background

Provide MDs with nearby computation resources

Redeuse the delay of task processesing

Computation Offloading

Table of Contents

Introduction

Background

Contribution

System Model

Communication Model

Computation Model

Problem Formulation

Markov Decision Process

QoE Optimization Problem

DRL-Based Offloading Algorithm

DQN-based solution

Performance Evaluation

Conclusion and Future Work
