

QOCO: A QoE-Oriented Computation Offloading Algorithm based on Deep Reinforcement Learning for Mobile Edge Computing

Iman Rahmati, Hamed Shah-Mansouri, and Ali Movaghar

Sharif University of Technology, Tehran, Iran

September 27, 2023

Overview

Background

Contribution

System Model

- Task Model

- Communication Model

- Computation Model

Problem Formulation

- Markov Decision Process

- QoE Optimization Problem

DRL-Based QOCO Algorithm

Performance Evaluation

- Simulation Settings

- Performance Comparison

Conclusion and Future Work

Table of Contents

Background

Contribution

System Model

- Task Model

- Communication Model

- Computation Model

Problem Formulation

- Markov Decision Process

- QoE Optimization Problem

DRL-Based QOCO Algorithm

Performance Evaluation

- Simulation Settings

- Performance Comparison

Conclusion and Future Work

Background

Mobile Edge Computing

Revolutionizing the future of MD Networks

Provide MDs with nearby computation resources

Redeuse the delay of task processesing

Computation Offloading

Table of Contents

Background

Contribution

System Model

Task Model

Communication Model

Computation Model

Problem Formulation

Markov Decision Process

QoE Optimization Problem

DRL-Based QOCO Algorithm

Performance Evaluation

Simulation Settings

Performance Comparison

Conclusion and Future Work

Contribution

Provide MDs with nearby computation resources

Reduce the delay of task processing

Table of Contents

Background

Contribution

System Model

- Task Model

- Communication Model

- Computation Model

Problem Formulation

- Markov Decision Process

- QoE Optimization Problem

DRL-Based QOCO Algorithm

Performance Evaluation

- Simulation Settings

- Performance Comparison

Conclusion and Future Work
